Stav Fisher Gross

Product Design Lead

Tel Aviv, Israel · stav.bsh@gmail.com · +972 50-894-9469 · linkedin.com/in/stav-bsh · stav-fg.github.io

Summary

Product design lead with 14 years of experience in complex operational software, including four years designing AI features for enterprise support teams at Salesforce. Founded the UX function in an Israeli Air Force software unit, and led a design team of three at Asperii.

Experience

Salesforce, Product Design Lead, Embedded AI (Service Cloud)

April 2022 to September 2026 · Israel

- Design owner for ten AI product areas in Service Cloud: real-time case classification, record companion registry, article recommendations, service replies, service reply for email, work summaries, enhanced summaries, case management, an AI adoption dashboard and SMS short-code onboarding.
- Sole designer on all ten, across six engineering teams in India, Israel and San Francisco, working with four product managers.
- Replaced static Figma handoff with interactive prototypes built on the internal design system, using agent tooling and Figma-to-code conversion.
- Owned accessibility for the product area.

Asperii (Aman Group), Product Design Team Lead

December 2020 to April 2022 · Israel

- Built and trained a design team of three on the Salesforce platform.
- Led design for a clinic management and scheduling system for a top-ten US healthcare enterprise, covering treatment plans, schedules and resource allocation across thousands of US clinics and hundreds more internationally.

Asperii (Aman Group), Senior Product Designer

September 2020 to December 2020 · Israel

- Promoted to Team Lead after four months.

Webiks, Product Designer

June 2017 to September 2018 · Tel Aviv

- Sole designer on an aircraft maintenance app for hardened tablets, used by the Israeli Air Force. It replaced paper reporting and several separate systems.
- Sole designer on a management and simulation system for large-scale multi-branch military drills.
- Research: interviews with experts and field technicians, Air Force base visits, field validation of mockups.

Career break

September 2018 to November 2019

- Travelled through twenty countries.

Israeli Air Force, User Experience Lead

January 2015 to February 2017

- Founded the Air Force UX wing and secured funding in the millions to staff it.
- Introduced UX into the unit's software development methodology.
- Ran the first UX conference held in the IDF.

Israeli Air Force, User Experience and User Interface Designer

June 2012 to January 2015

- First UX and UI designer in the Israeli Air Force. Volunteer role from 2012, official from 2015.
- Usability improvements to aerial defense support software, within legacy technology and with no redesign budget. Operator response times improved.
- Unit commendation of excellence, jointly with the development team, 2014.

Israel Defense Forces, Project management and training roles

July 2010 to June 2012

Education

B.Sc. Technology Management, Holon Institute of Technology, 2012 to 2017

Skills and tools

Figma, Salesforce Lightning Design System, prototyping in Lightning Web Components, AI-assisted build tools including Figma-to-code, accessibility. Research: interviews, surveys, shadowing, usability testing, field validation.

Languages

Hebrew (native), English (fluent)

Recognition

Award of Excellence, Israeli Air Force, for contribution during the 2014 operation.
